

QUALITY ASSURANCE PROGRAM

Product Outline:

- All component parts inspected at all levels to include:
 - Incoming inspection.
 - In-process inspection
 - Final inspection.
- At all three levels of inspection we test for:
 - Any failure effect: cause & correction evaluation.
 - Process controls.
 - Quality of the product itself.
- We have process controls active and in-place.
- Our reliability level is continual and ongoing. Testing is conducted in a real time setting.
- Electronic signal levels are field tested and functioning on working vehicles.
